

Accelleran wins Tech Tour 2017 European Venture Contest Final (EVC Final)

by *admin_accelleran*

Accelleran won the TechTour 2017 **EVC Final Award Ceremony** held in Düsseldorf on December 11-12th to name Europe's best high growth potential technology companies and was selected as one of the top 20 European startups from more than 1250+ applying companies.

Accelleran won in the Digital Tech category of the 11th edition of the European Venture Contest Final (former European Venture Summit) – Europe's leading network and investment event for high-growth technological start-ups, venture capital investors and technological corporations.

This event took place on 11-12 December 2017 in Düsseldorf. It offered an incredible opportunity for entrepreneurs to grow their businesses across borders and engage directly with Europe's most active investors. The EVC Final presented 120 European startups from across Europe selected as the best presenters in their categories and regions to compete for a position in the top 20 European startups in cleantech, digital tech and healthtech.

The EVC Final was the culmination of **18 qualifying events** that took place in 2017 across Europe and across sectors, of which there were **1250+ applying companies, 600+ investors** acting as selecting jury members, **600+ semi-finalists**, and **125 finalists** who presented to panels of investors in Dusseldorf over the course of 2 days.

The presenting companies covered **20 tech sessions over 3 tracks** including **cleantech** (photonics, energy transition, materials and manufacturing, circular economy, foodtech, smart cities and mobility, and industry 4.0), **digital tech** (internet and media, B2B enterprise solutions, speech tech and context awareness, fintech, legal tech, and SaaS B2C), and **healthtech** (online hospitals and digital health, connected health, biotech, medical devices, therapeutics, digital imaging and digital health, and diagnostics).
